### Siemens Engine Management

E Series: EM Engines E Series: EM Engines ... Output of the EM-86 engine is 2065 kW at 50 Hz and when fueled with natural gas. At 60 Hz the output of the EM-100 is also 2065 kW. Unique among existing engines, the EM-100 is the only direct drive solution available for the 60 Hz market. ... Control Monitoring At Siemens we go one step further to ...

### E Series: EM Engines | Gas Engines | Siemens

Siemens Gas Engines are generating a lot of excitement for their innovative design and combustion technologies, which can deliver the highest electrical efficiency and displacement within the smallest footprint. When you consider that they can also be available in the fastest cycle times, they're the most competitive answer to your needs.

### Gas Engines | Power Generation | Siemens

SIMATIC Energy Manager is the energy management system for industry, certified in accordance with ISO 50001 With SIMATIC Energy Manager, you can visualize energy flows and consumption values in your processes in detail, assign them to the relevant consumers or cost centers, and identify why changes have occurred.

### SIMATIC Energy Manager - certified energy management ...

Our aerospace and defense verification management solution helps companies achieve faster time to certification by providing a single, integrated environment that ensures all product verification events, whether simulation modeling and analysis or physical tests, are driven by requirements, planned and executed in the correct sequence, link individual tests and analyses to necessary resources ...
